

2017 Outcomes Information

Glancy Rehabilitation Center is a licensed, 30-bed, inpatient rehabilitation program located in Duluth. Our goal is to assist patients in reaching their highest level of independence and safe functioning by providing high quality, compassionate health care.

2017 Outcomes Information

Number of patients served	627
Average length of stay	14 days
Patients discharged to home or community setting	71%

Patient Diagnosis

During 2017, rehabilitation services were provided to 627 patients including those in the diagnostic groups below.

Brain Injury	69
Other Neurological	17
Orthopedic	182
Spinal Cord Injury	77
Stroke	185
General Rehab	97
(Cardiac & pulmonary, debility and pain syndrome)	

Average Length of Stay by Diagnosis*

Rehabilitation patients receive a minimum of three hours of intensive therapy five days a week. Physical and occupational therapies are provided twice a day. When ordered by the physician, speech therapy is provided daily during the week. The majority of patients can expect their average functional improvement (comparison of abilities at admission versus abilities at discharge) to be comparable to the national average.

Brain Injury	14 days
Other Neurological	13 days
Orthopedic	13 days
Spinal Cord Injury	15 days
Stroke	16 days
General Rehab	12 days

**Average length of stay statistics are based on the average of all patients in each diagnostic group that were discharged in calendar year 2017. Length of stay may vary based on each individual's co-morbidities, complications and other pertinent medical factors.*

Returning Home and to the Community

The majority of Glancy Rehabilitation Center's patients return home or to a community setting at discharge. (Patients requiring additional care may be discharged to an extended care facility or to acute care.)

Brain Injury	71%
Neurological	81%
Orthopedic	71%
Spinal Cord Injury	77%
Stroke	64%
General Rehab	70%

Patient Satisfaction

During a time when they were faced with life-changing illnesses and injuries, patients consistently rated their experiences at Glancy Rehabilitation Center as positive. In the 2017 survey, 93 percent of patients said they would recommend Glancy to a friend or family member. The data for patient satisfaction is based on all survey results during calendar year 2017. Patients offered the following comments:

I was treated with respect and so much kindness.

The therapists were always courteous and helpful, and they always seemed to have my best interest at hand.

Dr. Bhole came by every day to update me on my care and answer all my questions. He was so good to me; he made me feel like a person and not a patient.
