2002 report to the community

GWINNETT HEALTH SYSTEM

PROMINA
Dear Neighbors,

On a crystal clear day in the fall of 2001, our world was suddenly made unrecognizable by flames, smoke, flying debris and choking gray dust. Thousands of vibrant, innocent lives were suddenly, horribly lost, and a national epidemic of fear, profound sorrow and impotent rage took hold. Our new reality was cold and harsh, and it showed us that, in mere minutes, the rhythms and routines of our lives can change forever. We learned, once again, that in this life, people are what matter most.

Along with our fellow caregivers across the country, we have felt great compassion for those so deeply affected by the attacks on September 11, 2001. The Gwinnett Health System family weathered this terrifying storm by leaning on each other as we focused even more intently on the work of caring for our patients, their families and the members of our community. We also ensured our readiness for the possibility of providing emergency services on a large scale by reviewing and updating our emergency response processes.

Our new reality – cold and harsh as it is – has made us more determined than ever to be the guardians of our community's good health. But we cannot do it without the skill, energy, dedication and compassion of what matters most – our people. Gwinnett Health System will always need to build and expand facilities and services to meet our community's needs, but a new building full of state-of-the-art equipment doesn't provide care. People do. Our people are our organization's greatest strength and most valuable asset. They've never wavered in their commitment to giving you – their neighbors – the kind of care and service they would want for themselves and their families.
Yes, our buildings are important. They give us safe, clean places to provide the care our community needs. Our programs and services are important. They allow us to effectively channel resources and energy into the areas that serve the greatest numbers of patients and customers. Our technology is important. It helps us offer efficient services that give patients greater comfort, quicker recovery times and better outcomes.

But none of these would matter if we didn’t have dedicated, caring people to staff the buildings, provide the services and use the technology to give you the care you need.

This year’s Report to the Community shines the spotlight on our people – those who care for you and those who work behind the scenes – and the things we’re doing to build and support our team. We invite you to read on and to see, firsthand, the very heart of our hospital system.

Sincerely,

Franklin M. Rinker
President and CEO,
Gwinnett Health System

Wayne Sikes
Chairman, Gwinnett Hospital System
Board of Directors and Gwinnett Health System Board of Directors
Gwinnett Health System has roots that go back nearly 50 years with the opening of Joan Glancy Memorial Hospital in 1944. Today, our 479-bed system includes three hospitals, plus supporting facilities. With over 3,700 associates and 700 affiliated physicians representing nearly 60 specialties, we take great pride in our role as guardians of our community’s good health. In fiscal year 2002, we cared for 370,013 inpatients, outpatients, emergency patients and newborns.

In Fiscal Year 2002, Gwinnett Health System’s team of associates numbered 3,712. Of those . . .

- 83 percent are females.
- 17 percent are males.
- 2,057 are in clinical jobs.
- 1,655 are in support jobs.
- 29 are full- or part-time physicians.
- 172 have served our system for over 20 years.
- 41 is the median age.
- 2,839 (or 77 percent) live in Gwinnett County.

During Fiscal Year 2002, our team handled . . .

- 22,976 admissions, up from 21,789 in 2001.
- 110,511 Emergency Department visits, up from 109,097 in 2001. (the second busiest Emergency Department in Georgia)
- 230,919 outpatient visits, up from 228,028 in 2001.

The widely diverse skills of Gwinnett Health System’s people would be those you’d need to run a small town. At GHS, we have it all:

- Leaders and administrative staffs.
- Doctors, nurses and a host of clinical specialists.
- A security force.
- Mail service.
- Telecommunications specialists.
- Computer, network and information technicians.
- Pharmacists.
- Chaplains.
- Purchasing agents.
- Chefs, caterers and food service specialists.
- A housekeeping staff.
- A full-service laundry.
- Repair and maintenance engineers.
- A construction services team.
- A storage/warehouse service.
- Teachers and trainers.
- Delivery and transportation technicians.
- Business managers and employment specialists.
- Planners and analysts.
- Marketers and public relations agents.
- Volunteers.

. . . And plenty of customers – our neighbors – who are always first and foremost.
What drives us?

Whether they provide patient care or support those who do, GHS associates join our team because they are driven by a desire to help others. Our people know that the quality of their work has an impact on the care our patients and customers receive. That’s strong motivation, and it fits perfectly with our organization’s most fundamental purpose – to be there with quality services and programs when you and your family need them. Our mission, vision and corporate values keep us focused on our highest priorities.

➤ Our Vision is to be the health system of choice in our community by enhancing the health of our patients and other customers.

➤ Our Mission is to provide quality health services to our community.

➤ Our Values, at left, guide us in living up to our mission and vision.

Facilities Designed By and For People

The more people you serve, the more space you need. At Gwinnett Health System, people – and ample space for their care – are highly prized commodities. In 2002, construction of the North Addition to Gwinnett Medical Center took shape, and with it, a widely held dream of caring for increasing numbers of patients in more spacious quarters.

The dream is wrapped around 83,840 square feet of fresh, new space in three stories of new construction. The Medical Center’s North Addition houses an expanded Laboratory, a spacious 18-bed Center for Neuroscience, a greatly enlarged and enhanced Cafeteria, and select support services. It also provides space for expansion of our very busy Imaging Services on the first floor of the Medical Center.

Space vacated by the Lab and Center for Neuroscience will be put to good use by other clinical departments whose staff members and growing patient populations will also flourish with a little extra elbow room. Completion is scheduled for December of 2002.
Though patient volumes continue to increase at Gwinnett Health System, the nursing shortage – here and across the nation – grows worse every year. Industry experts estimate that the nation’s hospitals have about 126,000 nursing vacancies, or about 12 percent of capacity.

Attracting qualified nurses and other clinicians is a major challenge for hospital recruiters. Gwinnett Health System constantly builds and adjusts its recruitment and retention program to help fill openings and to keep staffing levels high. Team-building strategies include:

- Partnering with nursing school programs at local colleges to provide hands-on clinical experience for students through nurse internship and externship programs.
- A nurse re-entry program that gives nurses who have been out of the workforce the training they need to update their skills, in exchange for a two-year commitment to Gwinnett Health System.
- Preceptor and peer mentor programs to support new or returning nurses as they settle into their new roles.
- A tuition reimbursement program to make continuing education more affordable.
- An associate referral award program that rewards associates who successfully recruit people to fill vacancies in shortage areas.
- An incentive program for clinical associates who agree to transfer to understaffed units or departments.
- Human Resources associates who are fluent in Spanish to remove language barriers in recruitment and retention of Hispanic prospects and associates.
- A partnership between Gwinnett Health System and Gwinnett Technical College to provide an English for Speakers of Other Languages class, offered on-site at Gwinnett Medical Center.
- A variety of professional development classes – clinical, management and computer skills – offered to associates on-site and free of charge.
- A wide range of choices in the Gwinnett Health System benefits program.
Gwinnett Health System treats over 200,000 patients and administers approximately 2.5 million doses of medication every year. In the midst of all that activity, error prevention is critical. With the right tools, however, mistakes can be greatly reduced.

In fiscal year 2002, Gwinnett Health System joined the PROMINA QUEST (Quality, Uniformity, Efficiency and Safety through Technology) project to get the customized tools that will make errors far less likely. Our custom-designed systems will enable our team members to combine proven safety practices with cutting edge technology for improved patient safety, reduced operating costs, better access to information, and – best of all – far fewer opportunities for error. Our systems will include:

- A clinical management system that features computerized clinician and physician order entry, results viewing and clinical documentation.
- A pharmacy information system that handles everything from work queues and label printing to medication administration records for nursing.
- A pharmacy robot automated drug-dispensing system, at left, nicknamed ART (accurate robotic technology), that includes a bar-coded administration function.
- A fetal monitoring and surveillance system with an archiving feature.
- A picture archival communication system for our Imaging Services department that transmits, stores and retrieves digital medical images.

The implementation of these systems, which is expected to be complete in 2004, is the most complex and far-reaching endeavor that our organization has ever undertaken. Not only will it mean great advances in our quest to improve patient safety, but it will also revolutionize the way we do our work.
At Gwinnett Health System, we view our fifth corporate value – Service to the Community – as an over-and-above commission that challenges us, corporately and individually, to give back to the community that supports our organization. And our opportunities are abundant:

- GHS associates exceeded the 2002 United Way goal amount of $80,000 by $28,739, for a system record contribution of $108,739.

- To address the community's need for better access to screening and diagnostic mammography and expanded services for breast cancer patients, the Gwinnett Hospital System Foundation rolled out the new three-year TIME MATTERS in the fight against Breast Cancer campaign. The first phase of the campaign was completed in October 2001 with the opening of the Marion Allison Webb Center for Screening Mammography. The second phase began in 2002 with the development of The Breast Health Education and Resource Center, sponsored by the American Cancer Society, at the Gwinnett Women's Pavilion. Plans are also underway for an expanded center for diagnostic mammography at the Women’s Pavilion.

- Through our Parish Nurse program, 10 local congregations are blessed with outreach services including health education, support groups and referrals.

- Emergency Department RNs who volunteer for the ENCARE (Emergency Nurses Cancel Alcohol-Related Emergencies) made 54 presentations on the dangers of drinking and driving to 3,453 area teens at several local high schools and churches.

- Over 21,000 community children were cared for at our Kids’ Clinic and 3,905 adults received medical services at the Miles H. Mason, Jr. Community Clinic. And at our OB/GYN Clinic, 22,625 patient visits and 1,549 births were recorded in 2002.

- The Gwinnett Health System Associate Leadership Committee, with the guidance of our Parish Nurses, spearheaded a new Holiday Outreach Program to help our associates reach out to needy families in our community during the holidays.

- On January 1, 2002, Gwinnett Health System adopted a system-wide Smoke-Free Inside & Out policy to protect the health of everyone who comes to our campuses and facilities.

REACHING OUT with caring from the heart

People are our organization’s greatest source of strength, inspiration and compassion. As your neighbors, we want to give you the same level of care that we would want for our own families.
Gwinnett Health System

Boards of Directors and Corporate Structure

BOARD OF DIRECTORS

Front Row (sitting left to right) Chung H. Lee, Richard Sikes, Kathryn Parsons Willis, Gregory Taylor, Clinton M. Day. Second Row (seated left to right) Marc Unterman, MD, Jay Desai, MD, Franklin M. Rinker, Willard C. Hearn, III, MD. Back Row (standing left to right) Virgil Sosebee, Wayne Sikes, Miles H. Mason, III, MD, Joseph C. Finley, MD, Charles Bannister, Edward W. Radford, Ph.D.
Leadership and Executive Councils

Leadership Council, which includes directors, management advisors, the Chief Operating Officer and representatives from key support and administrative areas, manages hospital system operations.

Front Row (sitting left to right) Lea Bay, Judy Keller, Steve Nadeau, Ron Corder, Mary Nash. Second Row (left to right) Laura Tucker, Scott Orem, Diana Potts, Georgia Brogdon, Susan Hunter, Ed Brown, Judy Lawing. Back Row (standing left to right) J. Thomas Karr, Jr., Polly Dorminey, Cathy Dougherty, Mike Hemphill, Bob Roe. Not pictured: Janet Schwalbe

Executive Council, comprised of the senior executive staff, is responsible for strategic planning and management direction.

Gwinnett Hospital System

Auxiliary and Volunteers

In the past year, the 328 members of the Gwinnett Hospital System Auxiliary donated 45,500 hours of skill, energy and service to our organization. The Joan Glancy Memorial Hospital Volunteers donated $25,579 to their hospital for needed equipment. The Auxiliary contributed $127,000 for equipment and supplies at Gwinnett Medical Center, as well as making a three-year pledge of $150,000 to the Foundation’s TIME MATTERS campaign.

Gwinnett Hospital System

Foundation

The Gwinnett Hospital System Foundation is a private, not-for-profit corporation that supports Gwinnett Hospital System in fulfilling its mission — providing quality health services to our community. Specifically, the GHS Foundation supports one of Gwinnett Hospital System’s core values — Service to the Community. We do this by funding programs that meet community needs for awareness, preventive medicine, health education and indigent care. Our Board of Trustees manages the business affairs of the Foundation, and the Development Board develops and coordinates all fundraising strategies. The Development Council, made up of all active volunteers, implements our fundraising activities.

TIME MATTERS in the fight against Breast Cancer

Phase I of the TIME MATTERS campaign, the Marion Allison Webb Center for Screening Mammography, was complete in October, 2001. The center has reduced the wait time for a screening mammogram from more than two months to less than one week. With three additional mammography machines dedicated to screening procedures, the new center has increased the number of patients served per month from 650 to 1,028.

Thanks to the donors and volunteers of the GHS Foundation for recognizing that TIME does MATTER when lives are at stake!

The GHS Foundation Donors

The Gwinnett Hospital System Foundation exists today because of the generosity and philanthropy of our community. As our donors help us build a solid framework to assure that the healthcare needs of our community are met, the Gwinnett Hospital System Foundation annually acknowledges and thanks those donors who make contributions at various giving levels.

The Foundation’s STARS (Standing Together Associates Reach Success) associate giving program reached its three-year goal for the Kids Care Campaign six months early. The additional $70,000 raised was earmarked for the TIME MATTERS campaign. The new three-year STARS program, which will also benefit TIME MATTERS, began in 2002 with $729,000 in pledges from 1,500 associates, a system record.
