Gwinnett Medical Center continues on the path to transform healthcare in Gwinnett. We have set out to meet our community’s ever-growing needs with the best healthcare available. While there is still considerable work ahead, the hard work of planning, advancing and transforming healthcare is becoming evident.

The exterior of our new patient tower in Lawrenceville is now finished. The work on the interior of the building is coming along at a great pace, with the building expected to house its first patients in the fall of 2009. This new patient tower will be a major achievement in the transformation of Gwinnett healthcare. With its opening, many plans and goals will be fulfilled, including:

- Expanding capacity for new and existing specialty programs
- Reducing hospital overcrowding and long Emergency Department wait times
- Keeping GMC at the forefront of medical technology
- Enabling GMC to remain a caring pillar in the community

In the fall of 2008, we opened a comprehensive imaging facility in Hamilton Mill to meet the needs of the residents of north Gwinnett, south Hall counties and surrounding areas. We also opened a second Center for Sleep Disorders in Duluth at the Glancy Center, where the former home of Joan Glancy Memorial Hospital now also houses Glancy Rehabilitation Center and the former Center for Diabetes & Nutrition Education Center.

Another rapidly progressing development is our plan for a new heart surgery program at Gwinnett Medical Center. Our community and its leaders have voiced their unwavering support of the need for this program, and the Georgia Department of Community Health will announce their ruling on our Certificate of Need application by the spring of 2009. Stay informed of the latest news on our quest to bring open-heart surgery to GMC at www.openheartgmc.org.

In addition, a new Medical Office Building on our Lawrenceville campus will break ground in 2009 with an anticipated opening in mid-2010. This new facility will house doctors’ offices and serve as a women’s and cancer specialty center.

The road to transformation is an exciting one, and the journey thus far has been very rewarding. Thank you for continuing along with us as we bring the best healthcare available to our community.

Sincerely,

Philip R. Wolfe, FACHE
President & CEO

Gwinnett Medical Center – Duluth, north Atlanta's first all-digital hospital, opened in October 2006. The hospital’s advanced technology and architectural design provide our patients with a healing environment and a new level of care.

GWINNETT MEDICAL CENTER HAS A VISION

Gwinnett Medical Center has a vision to advance and transform healthcare in our community and ensure that the best care is available for every patient we serve.

Meeting the healthcare needs of our community is why Gwinnett Medical Center exists. For this reason, we make every effort to ensure that all care is available to everyone who needs it. Community support is essential to the success of our hospital. The Gwinnett Medical Center Foundation is working diligently to fund these growth initiatives and to expand the donor base by advancing philanthropy.

To help support our transformation of healthcare, the Gwinnett Medical Center Foundation invites you to learn more about Gwinnett Medical Center’s vision for the future, visit gmcfoundation.org.

Planning

Transforming

Our solution—more beds, more services throughout the community, more physicians and top quality clinical staff to serve our population’s healthcare needs.

The next step is the completion of an surgical tower, 155-bed surgical tower on GMC’s, flagship campus in Lawrenceville in 2009.
