Treatment in One Location

The Back Pain Center is staffed by board certified physician assistants experienced in back care and treatment, plus highly-specialized back and spine doctors who can diagnose, treat and perform surgery, if required. Imaging services such as X-rays and MRIs are readily accessible from the Back Pain Center. Physical therapy, pain management, and medical weight management services are additional resources offered to patients at the Back Pain Center.

We recommend you talk with your primary care doctor about your back pain. If your doctor thinks you need specialized care, they can refer you to the Back Pain Center.

We accept walk-ins, but there may be a wait. Appointments are strongly encouraged. To make an appointment, call 678-312-2002.
